

PU Leather Office Chair Executive Padded Black

RRP: \$439.95

As anyone who has spent long hours at the office knows, a quality office chair is essential. For all the "desk warriors" out there, we've got exactly what you need with the Executive Office Chair with Lumbar Support.

This office chair in all-black features quality craftsmanship that translates into durability and comfort. A premium PU leather has been chosen for its resilience and for its look and feel. This material is hassle-free; just wipe with a soft cloth to keep it looking fresh and new. And its classic design is sure to turn heads and impress clients.

But naturally, looks are not the only consideration. Independent height and tilt adjustments make sure your hips are aligned and that your feet stay planted firmly on the floor, which is important for long-term proper posture and reduction of body fatigue. Double-layer padding — complete with extra padding on the arm rests — ensures supreme comfort which promotes back and spinal health. And a built-in lumbar support provides a firm foundation to ease lower back ache.

The base is made from a tough powder-coated chrome finishing, and five wheels give you a full 360 degrees of rotation for mobility and portability around the office.

Treat yourself, and eliminate the body aches that come with an inferior office chair. Purchase your Executive Office Chair with Lumbar Support today.
