

## 10 x 1200 Tall Panel Pet Exercise Pen Enclosure

Out of Stock: \$1,139.95

This ten-panel solidly built play-pen for pets is designed with two customers in mind - you and your pet! It is built to keep the biggest and strongest dogs inside where you want them and where they are safe. But it is also perfect for the small dogs and cats to romp in. The square tube frame allows even the biggest dogs to roll up against it without fear that the structure will collapse. The panels are tall enough that there is no concern about your large dogs jumping over them and escaping. The uniquely designed barn door system allows pet owners easy access without allowing your pets to escape through the same door.

Another fan of the play-pen will be the Mummy dog who can take a breather from her pups and leave them to play and sleep without her. Neither pet owner nor dog mum need worry about the pups being left alone in the secure structure that features an enclosed bottom gate. The pups can be outside alone to get the fresh air they need without having to be attended to every minute. The play-pen offers great flexibility to meet your individual needs. It can be fashioned in a square, rectangular or circular formation.

The play-pen system affords its owners great versatility. It can be set up inside as well as outside. The play-pen can keep your pups confined to the space you want inside to keep your entire household from the total chaos that new pups can engender. The play-pen has a tools-free construction and the ten separate panels can be used to suit your particular design and size requirements.

Confining an injured pet in a play-pen will ensure that he does not suffer further injury. A sick dog will feel the comfort of a safe haven when confined in the structure. The play-pen system is convenient and mobile. It collapses to a flat pack that makes travel with your pets effortless and convenient. And its sleek design allows for easy storage when not in use.
