

8KG, 12KG, 16KG Pro-Grade Steel KettleBell Set

RRP: \$659.95

Add our pro-grade kettlebell set to your at-home gym. It is an essential piece of equipment for your fitness routine. The set is constructed of steel, not cast iron like many kettlebell sets are made from. The slimmer handles that the individual pieces are equipped with allow for easy gripping and prevent lateral slippage. The slimmer handles on our kettlebell set are ideal for high rep sets because they minimize fatigue. The set was designed to give the user better ballistic abilities along with easier and more natural mobility during the entire workout.

Don't rely on the schedule of a private club to dictate when you can work out. By adding this pro-grade competition level kettlebell set to your at-home gym, you can work out when and how long you want. This important part of your fitness routine will show fast results.
