

Professional Aluminium Safety Scaffold With Hatch

RRP: \$1,549.95

Safety and efficiency! That's our multi-use aluminum one-level scaffold.

For all those chores around the house that require a ladder - think scaffold instead! Using a scaffold is safer and more convenient. It allows you the freedom to work on large portions of your job without the troublesome and potentially dangerous necessity of constantly getting down off your ladder and moving it. Whether painting your house, cleaning your siding, flushing out your gutters or installing new guttering and lighting, your life will be made easier and safer when using a scaffold.

This aluminum one-level scaffold is sturdy yet its relative light weight makes it easy to move about. The maximum standing height is a generous 1.8m and the reinforced frame is HEAVY DUTY. The scaffold's strong aluminum construction and its safety lock mechanisms are two ways in which this product adds the optimum degree of safety to those must-do chores.

The 4x5" castors makes the aluminum scaffold mobile and easy to move about. The platform is adjustable to suit your task and the high quality Mariner plywood deck features a hatch door providing a secondary way to access or leave the scaffold. The scaffold can stand up to any weather - hot or cold and sunny or rainy. The one-level scaffold is easy to assemble and its foldable design makes storage hassle-free.

Specifications:

- Strong aluminum construction
- Scaffold size: 1.9 x 0.75 x 1.9m height
- Maximum Standing Height up to 1.8m
- Gross weight 42 kg
- 4x 5" Castors with swivel locks
