

DIY Outdoor Awning Cover 1.4m x 1m Polycarbonate

Out of Stock: \$624.95

Add shade and an attractive structural touch to your exterior entrance or exit with the DIY Outdoor Awning Cover. As the name implies, this is a true do-it-yourself product: a detailed instruction manual is included, and all parts and accessories you'll need for a simple setup are included.

The awning is specifically designed to resist rusting and provide years of beauty. And if you happen to require wider awning coverage.

Spruce up your outdoor area with ease with our DIY Outdoor Awning Cover.

The discrete gutter is perfect in channelling water away from the edges and safely to the sides to minimise the user below from any water exposure from overflow.

Slim and stylish alloy aluminum support brackets, aluminum trims and solid polycarbonate sheet were elegantly combined with both the modern appearance and the function in mind. Aluminum Frame Specifically designed to resist rusting. This kit comes packed with a Clear 3mm polycarbonate sheet. Heat Stop is an innovative development in polycarbonate roof sheeting. This product effectively eliminates more than 60% of the radiated heat of the sun, resulting in a cool shaded environment. Clear % Light Transmission 90 22 % Light Reflectance 12 75 % Solar Energy Rejected 12 68 Polycarbonate roof sheeting is manufactured using modern technology to create a highly UV stabilised weathering surface on the sheet. This UV layer will not crack or delaminate, and ensures years of trouble-free performance in the harsh conditions.

Features of the DIY Outdoor Awning Cover:

- Do-it-yourself awning kit: all parts and accessories you need are included
- Awning dimensions: 1000 x 1400mm
- 3mm clear SOLID polycarbonate awning cover
- Specifically designed to resist weathering and rusting
- Detailed instruction manual included

Please note: even though this DIY Awning is very easy to assemble, installation of pop rivets and dynabolts required some handyman skills. After installation we recommend you to seal any gap between the wall and the back aluminum trim with the Clear Silicon and to secure all nuts with the Lock Tight Adhesive Does not include: tools, drill bits, silicone, Lock Tight Adhesive, pop rivets and additional bracket
