

Full Knee Support Brace Knee Protector Medium

RRP: \$29.95

Protect your knee while you play football, go cycling, or even run with this full knee support brace and knee protector from Randy & Travis Machinery. With a support strap to support your patella, this protector gives you maximum support for your knee joint.

People with osteoarthritis will find that this brace helps to reduce pain while increasing mobility. Athletes with sore knees, too, may find this a helpful aid to keep them on the field and out of the surgery.

With comfortable gel padding and adjustable fit, this brace will mould to the shape of your knee for ultimate comfort. A support pad keeps your kneecap from slipping, reducing stress on the joint. Your knee joint will stabilise, while still allowing maximum mobility.

When you wear this knee support brace, you'll feel like you're getting a massage with your every move. Take the pressure off your knee and help to reduce inflammation when you wear this brace. Breathable fabric wicks away sweat, no matter how hard the workout.
