

2x 100kg Aluminum Alloy Double Locking Suction Cup Glazer Glass Sucker Lifter

RRP: \$69.95

Flat items, particularly those made of glass, are difficult—often dangerous—to carry. With these double locking suction cup lifters from Randy & Travis Machinery, though, moving even heavy items will be a breeze. With a load-bearing capacity of 100kg per lifter, you can handle almost any load.

Their double suction cups spread the load over two areas, making it easier to lift. Manufactured from strong, yet lightweight aluminium, they won't add to the load, but have incredible lifting power. Fasten them by clipping down the handle on each suction pad, and then release them by lifting the handles up when your work is done.

If you are in the construction industry or are an avid DIYer, you need a set of these handy lifters. Buy yours today!

Features and specifications:

- Quantity: 2
- Load-bearing capacity: 100 kg per lifter, 50 kg per cup
- Suction pads per lifter: 2
