

2x 150kg Load Aluminum Triple Suction Cup Pad Glazer Glass Sucker Remover Lifter

RRP: \$89.95

When you need to move glass items—like mirrors, windows, and doors—it can get dangerous. No matter how careful you are, there's a chance the glass may shatter—and cause an injury.

With these aluminium triple-suction pad lifters from Randy & Travis Machinery, your worries can be gone. These lifters can handle a 150-kilogramme load with ease, making your work, and that of your employees, relatively danger-free.

Crafted from lightweight, yet strong aluminium and rubber, these lifters add little additional weight to the load. Triple suction pads spread the load across a wider area, giving you more lifting power. They work equally well for moving other flat items, such as plastic or vinyl windows or table tops.

Features and specifications:

- Quantity: 2
- Load-bearing capacity: 150 kg per lifter, 50 kg per cup
- Suction pads per lifter: 3
- Material: Rubber and aluminium alloy
- Colour: Yellow
- Diameter per cup: 118 mm
- Method: Clip the handle on each suction pad to create suction
- Uses: Moving breakable flat glass surfaces, flat vinyl- or plastic-surfaced materials
