

4x Plastic Traffic Bollard Barrier Post Crowd Control Safety

Out of Stock: \$149.95

In fluorescent orange and yellow, this set of four plastic traffic bollards from Randy & Travis Machinery is perfect for traffic control, crowd control, or marking off spills, potholes, construction areas, or other hazards. Crafted from durable, yet forgiving plastic, these bollards can hold up under the thumps and bumps of a car park, yet not damage the vehicles that run into them.

Use them as barrier posts to rope off an area to keep people away from building entrances or emergency sites—or simply to indicate hazards. Easily stored in a closet when not needed, these high-visibility bollards are a valuable tool for construction companies, offices, shops, plazas, or government agencies.

Features and specifications:

- Dimensions: 195 mm x 80 mm x 750 mm (l x w x h)
- Colour: Safety orange with yellow reflective bands for night usage
- Material: Plastic
- Quantity: 4
- Uses: Marking off-road or indoor hazards, directing traffic, cordoning off restricted-access areas
- Durability: Holds up well under even challenging weather and traffic conditions
