

60cm Round Convex Mirror Blind Spot Safety Traffic Driveway Shop Wide Angle

RRP: \$139.95

This 60-centimetre convex round blind spot mirror by Randy & Travis Machinery helps to prevent accidents by reducing blind spots in parking garages, driveways, alleys, factories, hospitals, warehouses, or streets. Its convex, wide-angle surface increases the range of vision, allowing drivers and pedestrians to see and avoid hazards ahead, even when there is an obstructed view.

Equally effective indoors as a security device, the mirror's wide-angle construction maximises visibility, allowing managers, security personnel, and others to view unguarded areas of a shop, warehouse, or factory. Thanks to its wide-angle mirrors, you can use it overhead to get a panoramic view of the premises.

Features and specifications:

- Material: Shatterproof, lightweight, and flexible polycarbonate and polypropylene
- Diameter: 60 cm, with a small rain hood to protect it from wet weather
- Weight: 1450 g
- Quantity: 1
