

340Kg Salvage Strong Recovery Magnet Neodymium Hook Treasure Hunting Fishing

RRP: \$124.95

If you like the thrill of the hunt when it comes to buried treasure, this powerful neodymium fishing magnet from Randy & Travis Machinery is for you. Its hefty 340-kilogramme pulling force can help you locate and extract metal objects wherever they are—even if they're under water.

Small in size, yet incredibly powerful, these magnets will attract metallic objects even if they're rusty or covered in mud or moss. There's not a better family activity than a treasure hunt—and this two-sided magnet is just what you need for afternoon after afternoon of non-stop fun.

Rare-earth neodymium combines with iron and nickel to create magnetic power that tops every other magnet on earth. That gives them the capacity to attract metallic objects in rivers, oceans, and lakes.

These magnets are so powerful that you'll need to keep them away from electronic devices, metering equipment, and medical devices. If this is the kind of magnetic power you want for your forays in search of treasure, buy one of these power-packed neodymium magnets today.
