

Outdoor Patio 4-Piece Cantilever Offset 3M Umbrella Base Stand Weight Water Sand

RRP: \$289.95

Need a some respite from the sun? Whether it's your patio, your garden, or your favourite out-of-the-way beach, this offset umbrella base by Randy & Travis Machinery will protect you from the sun's harsh rays. Simply fill the base with water or sand, and it will keep your umbrella stationary even through moderate to high winds.

Crafted from heavy-duty HDPE with fade-resistant UV protection, this umbrella base weight is designed to last. With its four-plate construction, this base works with not only four-plate configurations but with two- and three-plate configurations as well, depending on your needs and those of your space. Each of the four parts can weigh up to 15 kilograms, giving the entire base a hefty 60.6 kilograms of support for your umbrella.

With its neutral black colour, this base looks great with all styles and colours of umbrellas and goes from patio to beach with ease. Get ready to enjoy the outdoors in optimum comfort this spring and summer. Buy one of these versatile patio umbrella bases today!

*Note: This base is not compatible with Roma outdoor umbrellas
