

90cm Heavy Duty Rubber Curb Parking Guide Wheel Driveway Stopper Reflective Yellow

RRP: \$119.95

Protect your customers' cars from bumps and scrapes with these high-visibility rubber parking curbs by Randy & Travis Machinery. Its high-contrast black-and-yellow colour makes it easy for drivers to see—even in the evening. Not only will it protect your customers' vehicles, but it will keep your landscaping, sidewalks, and walls safe from distracted drivers' errors.

While concrete will crumble, chip, crack, and corrode over the years, this heavy-duty rubber construction will keep on doing its job—even during the harshest weather conditions. It even resists petrol, UV light, moisture, and oil damage as it protects. Unlike concrete, you can use this parking curb in temporary parking spots, such as at events or during remodelling. And, in contrast to concrete parking curbs, this one won't end up in a landfill when you need to redo the parking lot. And, since it's crafted from eco-friendly, recycled rubber, you're helping to reuse the earth's precious resources.

Even though it's extremely durable, this rubber parking curb is flexible enough to install on uneven surfaces, such as gravel, since it conforms to the surface's every bump and curve. Since it's easily removable, you can reuse it when you remodel your parking space. It's light in weight and easily stored during the remodelling process.

Perfect for all parking surfaces both inside and out, this parking curb is easy to install, requiring little to no skilled labour. It comes with ½-inch pre-drilled holes, so all you need is the hardware and the tools to bolt them onto the surface.

Update your parking spaces and get more smiles from your customers. Get these parking curbs today.

Features and specifications
