

Archery 3D Dice Target Cube Reusable 18 Sides 23CM Self Healing XPE Foam Target

RRP: \$129.95

If you love bow hunting or archery, you need to practice to keep your skills in great shape for the upcoming hunting and competitive seasons. With this three-dimensional target cube from Randy & Travis Machinery, you'll be ready to take on all comers. Reusable and durable, this foam target has 18 sides so that you can hone your skills from all angles.

At only 23 centimetres on each side of the die-shaped target, it's easy to transport when you're out in the field. Its built-in handle makes it easy to carry. It works with both timber and carbon fibreglass arrows and is as tough as targets come, thanks to its high-density construction. Crafted from self-healing XPE foam, this target allows you to remove your arrows without leaving holes. Heat-fitting technology eliminates the need for glue, allowing it to stand up to whatever Mother Nature dishes out.

Its high-visibility markings are imprinted on most of its sides. Perfect for practice for either hunting or competitive archery—or just for fun! If you love bow hunting or are an archery fan, this target is a must-have. Order yours today.
