

Electronic Digital Baby Scale Weight Scales Monitor Tracker Pet

Out of Stock: \$174.95

When a new bundle of joy comes into your family, you want to care for him or her to the best of your ability. One of the most important measurements during those early months is your baby's weight. Keep track of your newest family member's weight with this highly accurate digital baby scale from Randy & Travis Machinery.

With a maximum weight capacity of 20kg, this electronic scale can track your baby's progress for many months after his or her birth. Even when your baby gets a little wiggly, no worries. Its hold function locks in Baby's weight so you can record it later.

After Baby is mobile enough to climb onto regular scales, you can use this scale to keep track of your pets' weight – also an important metric, according to most veterinarians. Its high-precision 10-gramme gradation assures pinpoint accuracy.

Wipe it down with an antibacterial solution, and you can even use it to weigh food and your baby's formula. The scale's tare function allows you to set the weight to zero with an empty container, allowing you to weigh only the contents. It also allows you to zero out Baby's blanket or other clothes, giving you an accurate read on your baby's actual weight.

For accuracy and comfort, this baby scale is one of the best on the market. Order yours today!

Features and specifications:

- Material: Baby-safe ABS
- Weight: 2.1kg
- Dimensions: 55 x 33.5 x 4.5cm (L x W x H)
