

1.8m Sliding Barn Door Hardware Heavy Duty Sturdy Kit

RRP: \$149.95

If you want to add a rustic vibe to your home while saving space, a sliding barn door is the way to do it. With Randy & Travis Machinery's heavy-duty hangers and hardware piling on the rustic vibe, your barn door will become the focal point of your room. This six-foot hardware kit comes in an attractive, go-with-anything black that will blend in with practically any colour palette. The sliding door design is great in tight spaces since it doesn't need to open into the room.

The tracks and pulleys are sturdy and durable. Crafted from high-strength industrial-grade metal, they can handle up to 160 kg loads. Fitting doors from 3.5 - 4.5cm thick, this hardware works equally well in exterior settings, such as stables and barns, thanks to its rust-resistant track. Two anti-jump disks keep the roller on the rail, while an upside-down, T-shaped guide keeps the bottom of the door from swinging outward or inward. It's quiet to operate, and you can install it on a wide variety of walls. Give your home a little touch of country. Order your barn door hardware today!
