

## 4 x Double Suction Glass Lifting Tool 70kg Vacuum Puller Lifter Aluminium

RRP: \$149.95

Need to lift materials safely so you can move them from place to place? This set of four double-suction cup glass lifters by Randy & Travis Machinery is the perfect solution for DIYers and tradesmen alike. Able to handle items weighing up to 70 kilogrammes, these lifting tools' secret lies in their powerful vacuum suction cups. With light aluminium handles and two soft, cushiony rubber suction cups per lifter, these tools make it easy to carry not only glass, but also other smooth, difficult-to-transport materials, like tile, smooth plastic, and coated plywood. They're easy to use. Just place the suction cups on the material, fold down the levers, and like magic – the cups grip the sheet of glass or other material, allowing you to carry it easily to your home or work site.

The handles are easy to use, with an ergonomic design that goes easy on your hands. Once you get your materials where they're going, simply fold back the levers, and its quick-release action will let go of them quickly. Don't make your work harder than it has to be. Order your suction glass lifters today!
