Features of 4-Digit Combination Lock:

When airtight security is a must, this four-digit combination lock by Salvatore Angelotti is the perfect choice. With 10,000 different combinations, trying to crack the code will be a near-impossible task! Each order comes with a master key, so you can gain access even if a user forgets the combination. Crafted from heavy-duty premium metal, this lock is sturdy and durable, making it super tough to physically crack. Moisture- and corrosion-resistant, it's an excellent lock for lockers in locker rooms with water features.

It's the ideal option for lockers in gyms, schools, hotels, offices, and other workplaces. Use it on lockers in your garage to secure valuable tools or even in a wardrobe to keep coin collections, jewellery, or other valuables safe inside your home. Simply store the key in a secure location, and you'll have rapid access to items inside the locker if the user leaves or can't remember the combination. Keep your customers' belongings secure.

Note: Each order (not lock) comes with one master key only, regardless of

how many different locker units, quantities or combinations purchased. A master key is sensitive in nature. An additional master key can be purchased on special order only. Locker assembly required; instructions and hardware included.
