

## Universal Car Top Roof Rail Rack Cross Bar Aluminium Lockable 1350MM

RRP: \$239.95

If you like to carry cargo with you, whether for work or fun, a roof rack extends the amount of cargo your vehicle can carry. With this universal roof rail rack by Randy & Travis Machinery, you can carry your belongings safely with minimal air resistance. A well-engineered T-slot channel makes it easy to install while maximising its aerodynamic design. Crafted from aircraft-grade aluminium, this roof rack, with its light weight and strength, ensures durability without a big drain on your vehicle's fuel consumption. It fits most vehicles, thanks to its adjustable width.

No worries about theft. This rack features an anti-theft security lock with independent keys. It's sturdy enough that you can take it off-road with confidence. It's perfect for larger cars, SUVs, and utes with raised roof rails that are up to 117 cm apart, with a minimum of 30 mm between the rails and roof. If your car, SUV, or ute fits this description, it's the perfect solution to family members who just can't pack light. It's also an ideal way to store extra equipment on business trips, holidays, or weekend camping trips. Don't wait for the summer to arrive before you buy. Get yours today!
