

## 360-degree Rotating 4 Tier Display Shelf Bookcase Organiser

RRP: \$244.95

Have you ever seen a rotating display at a store and wished that someone would invent something like that for the home? Now, they have. With this 360-degree rotating bookshelf by Randy & Travis Machinery, you can keep all your favourite books, plants, or collectables right by your sofa or bed. To change the display, simply rotate it, and you'll have a brand-new look. As shops have known for years, rotating storage offers more space than the usual side table or shelving because it gives you a full 360 degrees of storage.

But this gorgeous display cabinet looks nothing like the bare-bones utilitarian design most shops use. Its sleek, uber-elegant design creates a contemporary vibe in whatever room you put it in. Don't limit it to your home, though. It also gives your office a total update with storage that doesn't just maximise floor space but looks great as well. Its neutral white tones blend beautifully with a wide range of colour palettes, and its graceful curves are the perfect touch for practically any style of home décor. Crafted from high-quality, durable MDF, you'll have a piece of furniture you can enjoy for years to come. Once you've tried one of these rotating shelves, you'll want one for every room in your home! Order yours today!
