

50M Hose Garden Irrigation System Plant Watering DIY Micro Drip Kits

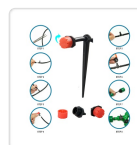

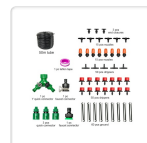

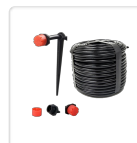

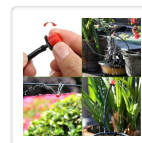

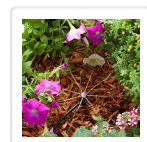

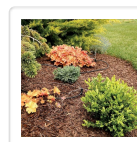

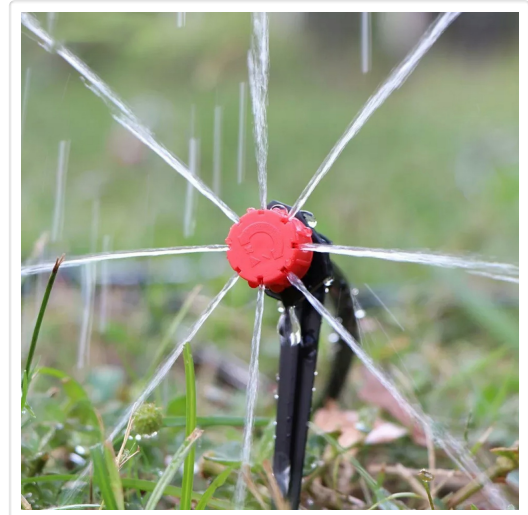

RRP: \$79.95

Get more out of your garden even during brutal summers with this 202-piece garden irrigation system by Randy & Travis Machinery. Its 50-metre hose reaches across large gardens. Never worry about forgetting to water your plants again. This automatic system will take care of it while you sit back and enjoy all those flowers and veggies your garden can produce. Save time and enjoy better yields by watering when your plants need it, not when you have an empty time slot in your schedule.

If you need two water lines of shorter length, you can easily cut the hose tubing to customise your application. With the Y-shaped faucet connector, you can run each line in a different direction, depending on the shape of your garden. It comes with drip heads that you can adjust for individual plants' needs — or turn completely off for plants that need only an occasional rain to keep them happy. This versatile system has applications outside the garden as well. Use it for your lawn, to cool down your balcony or patio, or even in your greenhouse to mist your plants. And, with everything needed to care for a garden all year round, this system makes a great gift for gardening enthusiasts of all ages. Order one today for you or that special gardener in your life!
