

3x3 Heavy Duty Machine Dolly Skate Machinery Roller Mover Cargo Trolley 6T

RRP: \$199.95

If you need to move super-heavy items either at home or at work, this 6-tonne capacity cargo trolley by Randy & Travis Machinery is just the ticket. Strong enough to handle just about any load you need to carry, this rugged steel dolly can handle even huge machines with ease, but it weighs only a little over 14 kilogrammes. Compact in size but massive in its hauling capabilities, it proves that tiny can be mighty when it comes to moving cargo.

Made from solid powder-coated steel with polyurethane-coated steel rollers, it manoeuvres easily – even with the heaviest loads. It's easy to store after you're done, making it easy for even smaller companies or families to own one. It's a must for warehouses, trucking and hauling services, or factories, but it's equally useful at home, particularly if you have extremely heavy items, like a grand piano, that won't fit or are too heavy for a regular hand trolley. It's practically maintenance-free and designed to last for many years to come. Don't miss out on your chance to get this versatile piece of equipment for your home or business. Order yours today!
