

100 Inch 16:9 Manual Pull Down Outdoor Projector Projection Screen Theater Movie

RRP: \$269.95

Whether it's for viewing old slides or films on the big screen, this projection screen from Randy & Travis Machinery is perfect for popcorn time. Both ceiling- and wall-mountable for use inside and out, this screen will provide you with hours of fun with your family and friends without having to squint. So, instead of paying high ticket prices at the theatre, save money and watch your favourite movies right at home. Measuring 100 inches across the diagonal in a 16.9 widescreen format, it allows everyone to enjoy home movies and videos from anywhere in the room. With a 1.1 gain and a viewing angle up to 160 degrees, it prevents hot spots and provides the utmost in clarity and image reproduction.

This screen is easy to install and maintain. With its built-in L-shaped bracket, installation will be a breeze. Its high-quality fabric cleans up with only soap and water. Its durable metal casing protects it from the wear and tear of everyday use – even if you use it on the job to showcase business presentations or teach concepts visually in the classroom. Its matte white surface diffuses light in all directions, but its black backing prevents light from penetrating the picture from behind the screen. For a superb viewing experience at home and at work, this projection screen is your optimum choice. Get yours today!
