

Security 5 Digit Combination Bike Cable Lock with Mounting Bracket

RRP: \$24.95

Whether you like to take the bike trails to work to lower your carbon footprint or just ride for pleasure and fitness, you need a safe way to store your bike when you get to your destination. With this five-digit combination cable lock by Randy & Travis Machinery, you can shop, work, or explore with complete peace of mind, knowing that your bike is safe from thieves. With keyless access, you never need to worry about forgetting or losing your key. It's easy to reset the combination, so you can change the combination as often as you need to. With its tough braided steel cable, you can rest assured that a thief will likely choose an easier target since it's extremely difficult to cut. The cable's protective coating prevents scratches and protects the cable from rust and corrosion.

This cable lock comes with both the mounting bracket and all the hardware you'll need to attach it to your bike. Installation is easy and fast, getting you back on the road quickly. Its neutral black colour goes well with practically any colour bike, so your bike will look great as you cruise the trails and streets.
