

Indoor Outdoor Garden Plant Stand Planter Flower Pot Shelf Wooden Shelving - 9 Shelves

RRP: \$79.95

If you love plants, an attractive plant stand is a must to showcase their natural beauty. With this lovely wood plant stand by Randy & Travis Machinery, you can display plants, works of art, or other collectibles in a natural setting that will complement any interior with its neutral, minimalist profile. Its airy design allows all the sunshine your plants need to pour in, while providing plenty of space between the shelves for your plants to grow.

The stained surface resists moisture, making it suitable for use outdoors on your patio or garden. The slats in the shelves allow water to drain out, avoiding overwatering issues. With generous space between the slats, air can circulate around your plants, helping them resist mould and get all the life-giving carbon dioxide they need to thrive from the air. It's the perfect gift for the plant lovers in your life – and makes a gorgeous focal point in your home or on your patio. Order yours today!
