

## Swing Ball Tennis Tether Game Outdoor Garden Summer

RRP: \$74.95

Do your kids love playing outdoors? You don't need a huge backyard to provide them with a fun way to get some sunshine and exercise with this swingball set from Randy & Travis Machinery. This classic backyard sport has revived in popularity not only for kids but also for adults who want to work off stress or train their racquet technique for their next round of tennis at the club. And, in kids, it helps develop their hand-eye coordination for other sports or everyday tasks. The two lightweight racquets are easy to handle but as durable as they come.

This game comes with everything you need to set it up and get playing as soon as you take it out of the box. Just tap the ground spike into the ground, get the pole and spiral rotor up, grab the racquets, and start playing. This set isn't like some of the cheap plastic sets you see on the market. This set features a tough and durable metal pole that can take all the wear and tear your active family can give it. Get your kids outside when spring comes our way. Order your swingball set today!
