

Kayak Canoe Wall-Mounted Rack Storage Brackets Swivel Sports Design

RRP: \$134.95

Features:

- **Space-saving:**
 - The lifting frame can be rotated 90 degrees, so items will block the way when not in use. After being easily folded, you can even remove the extended arm. Help you save garage space.
- **Sturdy metal parts:**
 - Our metal parts are very strong. Unlike other products, they are plastic parts that are prone to breakage. The screw holes are installed on a straight line. So the kayak frame has a side bracket, which measures 0.78 inches wide by 1.38 inches long. It can be installed on a wall with a minimum width of 2 cm. (0.8 inch)
- **Material and Capacity:**
 - It adopts heavy steel pipe structure and black rubber cover bracket. Exclusive multi-level anti-rust process. It can hold up to 100 pounds (approximately 45.4 kg).
- **Storing kayaks and paddles:**
 - The upper bracket arm helps you safely store most sizes of kayaks. The lower hook provides more storage space for paddles or hanging other accessories.
- **Spring button design:**
 - F tube and L tube are connected by a solid spring button. The hook joint is welded and has good load-bearing performance.

Note: Canoe / Oars not included
