

White Cube DIY Shoe Cabinet Rack Storage Portable Stackable Organiser Stand

RRP: \$184.95

Have so many shoes that you don't know what to do? Instead of having to hunt through a pile of shoes at the front door, get this innovative shoe storage solution by Randy & Travis Machinery. With three columns and eight rows of storage space, you'll have room for every pair of shoes you own and then some. And, if your footwear includes boots, simply remove one of the shelves, and you can store boots up to 30 cm tall.

Thanks to its modular construction, you can share the storage space with the rest of your family. Simply remove the sections you don't need and place them in another family member's room or wardrobe. Or, if you have a massive collection of shoes or a large family, use one of these shoe organisers at your home's entryway and another in your walk-in wardrobe. Use the top to hold your handbags, book bags, or other accessories so that you can just grab them and go. Done in neutral white, these shoe organisers blend in perfectly with most rooms' colour schemes. And, they make the perfect gift for the shoe lover in your life. Order yours today!
