

## Natural Soy Wax Candle Making Supplies Crafts [ 5kg ]

RRP: \$154.95

If you love making candles, this natural soy wax from Randy & Travis Machinery is the secret ingredient for perfect candles every time. This wax contains nothing but pure soy wax crafted from soy compound and hydrogenated soy oil — just straight from nature without any wax hardeners or other types of waxes mixed in. Its natural creamy colour looks great on its own, but you can also add colouring agents if you want a different look. Or, you can add scent if scented candles are more to your liking. This wax has excellent adhesion, with minimal shrinking or frosting — so you can even create candles inside decorative containers.

Soy burns evenly without dripping, so the candles you make are perfect for gift-giving or to set a romantic mood at your dinner table. And, soy candles are eco-friendly and sustainably sourced, unlike candles made with petroleum-based wax. So, if you plan to make candles as holiday gifts, get started early this year with this five-kilogramme box of soy wax. Order yours today!

### Features and specifications:

- Material: 100% natural soy wax
- Colour: Creamy white
- Quantity: 5kg
- Melting point: 52°C
- Congealing point: 34.3°C
