

100x Food Vacuum Bags Pouch Foil Aluminum Storage Bags Heat Seal 30x40cm

RRP: \$99.95

There's nothing more disappointing than to open a bag of food and find out that it's gone stale. Preserve the freshness of your favourite foods with these Mylar sealer bags by Randy & Travis Machinery. Crafted from Mylar with aluminium foil laminate, these bags are fantastic insulators and have an excellent gas barrier, keeping air and stale freezer smells out and your food perfectly preserved. Unlike cheap grocery store plastic bags, these storage bags are chemically stable — so you'll never need to worry about plastic molecules seeping into your food. Also, unlike the cheap substitutes, they have high tensile strength, so you need not worry about tears or breakage.

Not only are they freezer-safe, but you can also take them straight from the freezer into a boiling pot of water. They're light-proof and moisture-proof, so your food's colour and crispness will stay as fresh as the day you sealed them in the bag. If you have a sealing machine, these bags will help you get the most out of your investment. In fact, these bags are reason enough for you to buy a sealing machine — they're that good. Don't wait to enjoy fresher food. Order your Mylar sealer bags today!
