

Non Electric Bidet Toilet Seat W/ Cover Bathroom Spray Water Wash

RRP: \$244.95

Your bottom will thank you when you install this lovely non-electric bidet by Randy & Travis Machinery. Instead of wiping and wiping, irritating the delicate tissues in your personal areas, you can give those parts a soothing wash with a bidet instead. Using a bidet is more hygienic because it removes all the waste products completely and flushes them away easily. And, with its self-cleaning dual nozzles, you'll get plenty of clean, fresh water every time, delivered just the way you want it.

If you have an Australian standard toilet seat with an O-shape design, all you need to do is to remove your current seat and replace it with the bidet. Just connect to your water cistern with the included fittings — it's an easy DIY fix, and you won't have to call the plumber. It's the best of both worlds — you get all the cleansing power of a bidet without taking up extra floor space, as would a traditional bidet. This bidet features two settings, a gentle stream for your posterior and a spray setting for your feminine areas. And, it comes with a soft-close toilet seat cover, just like a regular high-end toilet seat. It even has a mounted lock in case you have small children in your home. Pamper your posterior with this easy-to-use bidet attachment for your toilet. Order yours today!
