

Cat House Weatherproof 2-Story Indoor Outdoor Wooden Shelter Bitumen Roof

Out of Stock: \$459.95

Your cat deserves a little spoiling now and then. This elegant cat condo definitely ticks off all the boxes. Stylish enough to be displayed proudly in your home, this two-tier kitty condo has plenty of room to house and entertain your feline friends. Crafted from premium fir timber, it will hold up for years to come. Kitty will love to peek out the windows while staying 'hidden' inside. And, inside the top section, you can hide your cat's litter box to keep it out of sight from family and guests.

That's not all. If your cat lives outdoors, this indoor-outdoor setup features an asphalt roof to prevent rain from seeping through. With its water-resistant coating, it will hold up to whatever weather conditions nature dishes out. Its grey-and-white colour palette will add a rustic, homey touch to your backyard. And, if you have feral cats in your neighbourhood, give them a safe place to shelter with one of these sturdy cat houses while they provide protection from rodents and other pests to you and your neighbours. Whether you have cats of your own or take care of feral animals, this cat house is a wonderful gift for your four-legged friends. Give your cats the privacy and security they crave with this elegant cat condo. Order your cats' new home today!
