

42-85" Inch 85kg Slimline Universal TV Tilt Wall Mount Bracket

RRP: \$109.95

Are you struggling with setting up your brand new LCD TV? Well, buckle up because this super functional TV Wall Mount Bracket from Randy & Travis Machinery is here to save your day! The streamlined design of this product is perfect for mounting your TV on the wall. You can tilt to at least 12 degrees forward. This feature is especially useful if your family watches TV in the bedroom.

Additionally, you can also mount your TV in the lounge or kitchen. You can mount your LED screens at a height suitable for everyone's eye level. Its versatility is what makes it worth having the product in your household. And the best part is that the forward tilt also helps to maintain the colour contrast of the screens.

If you're a first-time user of this TV Wall Mount Bracket, make sure not to mount the LED or Plasmas very close to the wall as it will hinder ventilation and heat the area. To ensure safety and durability, Randy & Travis Machinery made this product with cold-rolled steel and it also comes with many screws and bolts to make the installation process easier for you!
