

Tiles 3D Peel and Stick Wall Tile Dark Grey 10 Sheets

RRP: \$119.95

Not everyone wants the hassle of installing Subway tiles. If you want the look of expensive Subway tiles without having to do the work, Randy & Travis Machinery has ceramic-look moulded plastic tiles that will do the trick. These peel-and-stick tiles are easy to install.

They have a three-dimensional look that is similar to ceramic tiles. You can use them for an accent wall, on the backsplash of your kitchen or bathroom sink, on your caravan – or even on your kitchen island.

They are a brand of stick-on wall tiles with a wide selection of designs and colours to help you create the interior you have always wanted. Our high-quality wall tiles will significantly impact any space in your kitchen, bathroom, laundry room, and more.

The realistic look of these tiles will transform your home with a professional, finished design within a few hours without any special tools or skills. Plus, there's no mess!

They install over the ceramic tiles and smooth glass, mirrors, acrylic or linoleum wall panelling, or wallpaper. However, they don't work well with unfinished walls, unpainted plywood, or stone.

They are easy to clean with just a swipe of a damp sponge, making them the perfect solution for busy families. If you want to change the look of your tiles, you don't need to hire a professional. Just use heat (like from a hairdryer), and they will come off quickly. Then, you can put tiles up without any hassle.
