

360° Swivel Swing Hanger with Stainless Steel Hook for Ceiling Heavy Duty Hanging Gym Equipment

RRP: \$39.95

The Randy & Travis Machinery Swivel Swing Hanger with Stainless Steel Hook provides reliable hanging capacity for a wide range of gym equipment. With a weight capacity of up to 450kg, it's robust enough to suspend individuals during training, for example when completing exercises in a resistance harness or similar. When you need somewhere to hang a heavy punch bag, pulldown bar, rings, battle ropes, a trapeze, suspension straps or resistance band, this hook offers a versatile solution.

The hook is constructed from tough stainless steel that's resistant to damage from water, changes in temperature or UV light. The 360°swivel action allows a wider range of uses and facilitates movements that require a 360° range. All fixings and fastenings are included with the hook, which is easy to install and requires no special tools. This swivel hook arrives fully assembled and just needs to be fixed into position prior to use.

Features:

- Multi-directional, 360°swivel swing hanger
- Weight capacity of up to 450kg
- Suitable for indoor or outdoor use
- Ideal for hanging gym equipment, chairs, rockers, seats, children's toys and more
