

## 14-inch Round Wall Clock Silent Non-Ticking Quartz Battery Operated Wood Grain

RRP: \$74.95

The Randy & Travis Machinery Wood-effect Round Wall Clock is a versatile timepiece that's a great gift as well as a useful, attractive purchase for home or work use. Featuring a classic design, the wood-effect face is easy to clean and resistant to deterioration from moisture or UV light. It provides an excellent contrast to the aluminium hands - the clock can be read clearly at quite some distance. Contrasting white numbers ensure the clock is easy to read.

The silent mechanism is battery-powered, ensuring the clock will keep working in the event of a power outage or other electrical disturbance. A durable outer casing protects the movement from damage, resulting in a long-lasting clock that will usually provide many years of useful service. This clock looks great in any room in the home and is large enough to provide an attractive accent or feature to add visual appeal wherever it's located.

### Features:

- Attractive, long-lasting wood-effect face, complemented by an aluminium second, minute and hour hands
- Clear analogue numbers
- Silent, quartz action

### Specifications:

- Material: ABS/glass
- Dimensions: 35cm diameter
- Requires 1 x AA battery (not supplied)
