

304 Stainless Steel Swivel Lift Clevis Chain Crane Hook with Safety Lock 650kg

RRP: \$34.95

A hard-wearing, durable hook that's designed to work well in challenging conditions, the Randy & Travis Machinery 304 Stainless Steel Swivel Lift Clevis Chain Hook is tough enough to cope with use in industry, workshops, agricultural work and private garages and work sheds. The hook is constructed from 304 stainless steel, which means it's extremely resistant to corrosion or oxidation. This makes the hook a good option for outdoor use or indoor conditions where moisture is likely to be a problem.

The hook benefits from superior build quality, resulting in a smooth, consistent finish which eliminates the risk of snagging during lifting. An additional safety lock helps to keep materials securely in place whilst the hook is in motion.

At the top of the hook, the Clevis configuration enables it to be securely attached to a bracket or mounted on a chain if lateral movement is required. The 360° swivel action facilitates precision movements, enabling the hook to be used successfully in a wide range of different locations.

Features:

- Safety lock for added security
- Hard-wearing stainless steel construction
- 650kg capacity
- 360° swivel action

Specifications:

- Lifting capacity: 650kg
- Material: Stainless steel
