

1000x Tile Leveling System Clips Levelling Spacer Tiling Tool Floor Wall

RRP: \$104.95

Achieve level, evenly spaced tile installation when you use the Randy & Travis Machinery tile levelling system. Customers can buy clips, the spacing tool and packs of wedges either separately or as a bundle. Once the tile cement/adhesive is applied, place the clips and then install the tile. Insert the wedge and press it into position using the tiling tool. When the tile adhesive is dry, kick out the wedge and remove the white clips. The base of the clip is left under the tile.

This system is a fast, convenient method of ensuring tiles are level and even. It can be used with floor or wall tiles with equal success. If you're completing a succession of tiling jobs, it's possible to restock on clips and wedges as you need them.

Features:

- The kit ensures tiles are both evenly spaced and level
- Additional stocks of wedges and clips can be ordered
- Suitable for use on floors and walls

Specifications:

- The kit contains 1000 clips, 100 wedges and 1 pair of pliers
- Measurements: Clips measure 3.90cm high x 3.50cm wide; wedges measure 8.50cm long x 2.00cm wide; pliers measure 23.5cm length x 10cm high
- Material: clips and wedges are made from plastic. Pliers are made from steel and plastic
