

92cm Professional Rolling Mechanics Car Creeper Crawler Board Under Car Tool

RRP: \$129.95

A superior option for both professional and home garages, the Randy & Travis Machinery crawler board has an ergonomic design for maximum comfort while you work. It has wheels that fully rotate to give you free rein of movement and is made from some of the most durable materials you'll find on the market. The board has built-in storage to hold a number of tools and even your phone if you need to stay connected while you work.

Measuring 92cm x 43cm x 10cm, the board is light enough to carry across your garage or workshop but sturdy enough to offer optimal support when laying on it. It has 6 castor wheels beneath the board which can be rolled in any direction. They provide smooth transitions and are built to last. The headrest has padded cushioning to keep you comfortable during longer stints under the car. There are 2 generous storage trays incorporated into the design as well - there is a tray on each side, which is handy if you need a lot of tools with you.

We have incorporated a carry handle which can be used to hang the board up on the wall when not in use. It can also be left free-standing against the wall. All of the fittings needed for assembly come with the board, and an Allen key is also provided.
