

4 Layer 6 Pots Flower Holder Plant Stand Shelf 4-Wheel Free Moving Rack

RRP: \$124.95

Our attractive plant stand is a must to showcase your plants. With this pastoral-style plant stand by Randy & Travis Machinery, you can display plants or other collectibles of your choice that will complement any interior with its neutral colour.

The plastic material is designed to resist moisture, making it suitable for use outdoors on your patio, balcony, porch, or garden. Each holder is designed to allow water to drain out for those who are not using pot holders. With generous space between the holders, air can circulate around your plants, helping them resist mould and get all the life-giving carbon dioxide they need to thrive. It's the perfect gift for the plant lovers in your life – and makes a gorgeous focal point in your own home.
