

Humane Snake Trap Remove Small to Medium Snakes 2 Doors

RRP: \$99.95

In Australia, it is strictly prohibited to harm or kill snakes due to their crucial role in our ecosystem. However, we understand the need to keep them away from our residential areas. It's important to note that snakes typically only pose a threat when they feel cornered and act in self-defense. Moreover, they naturally avoid human contact whenever possible. This humane snake trap, equipped with two doors, is specifically designed to safely relocate small to medium-sized snakes.

With our humane snake trap, you can easily capture snakes without causing them harm. Once captured, you can safely relocate them to a more suitable habitat in the wild, far away from your home. This approach ensures both your safety and the well-being of these essential creatures in our ecosystem.

Features and specifications:

- Constructed materials that are resistant to rust and corrosion.
- Comes fully assembled and ready for immediate use. No complicated set-up required—simply set it in the desired location and let it do its job.
- Reusable - providing excellent value for your money.
- Measures 58 x 28 x 11cm (LxWxH)
