

Heavy Duty Commercial Garment Rack Double Bar Rolling Collapsible Clothing Shelf

Out of Stock: \$69.95

Introducing our Heavy Duty Commercial Garment Rack, a versatile and convenient clothing organizer. Whether you need to expand your wardrobe or create extra hanging storage space, this rack is perfect for keeping your clothes tidy and organised.

Designed for various settings, it is ideal for laundry rooms, bedrooms, and even as a display in stores or markets. The double bar feature allows you to accommodate a larger amount of clothing, while the two-layer rack provides space for shoes and shoe boxes.

The adjustable rods offer flexibility, with a height range of 80-150cm and a width range of 75-140cm. You can easily customise the dimensions to fit your available space and the quantity of clothing.

To ensure stability and prevent hangers from falling, each long hanging rail stand is equipped with anti-slip stoppers. These stoppers can also serve as a convenient hanger for bags.

Crafted from thickened stainless steel, this garment rack is corrosion-resistant and rustproof. It can even be used as an indoor clothesline pole during rainy days.

Mobility is made easy with the four PP wheels at the bottom of the rack. They allow for smooth movement without damaging the floor. The brake switch on the wheels ensures stability and safety by preventing the rack from sliding.

Specifications:

- Brand: Randy & Travis Machinery
- Product Type: Garment Hanging Rack
- Color: Silver
- Material: Stainless Steel
- Overall Weight Capacity: 35kg
- Garment Rack Size (Extended): 145x150x41cm
