

250pc Heat Shrink Spade Connectors Quick Disconnect Wire Electrical

RRP: \$59.95

Get the ultimate value pack with 250 heat shrink male and female spade connectors, perfect for all your electrical connection needs. These versatile connectors are designed to fit wires ranging from 22 to 10 AWG.

Experience the convenience of quick disconnects that allow you to make connections that can be easily disconnected in seconds. Whether you're working on a boat, car, motorcycle, home, stereo, or auxiliary lights installation project, these spade quick disconnects are your go-to solution.

We prioritize quality, which is why each spade connector is meticulously crafted from high-quality copper. The dual-wall heat shrink tubing with adhesive lining ensures reliable performance. These wire connectors not only crimp securely but also shrink and seal effectively.

Rest assured that your connections are strong and durable. The thick copper barrels enable tight crimps on any wire, while the heat shrink tubing adhesive provides an additional layer of protection against stretching and weather conditions. Say goodbye to wires pulling out of connectors - our spade connectors guarantee a secure and long-lasting connection.

With this value pack of 250 heat shrink male and female spade connectors, you can confidently tackle any electrical project with ease and reliability.
