

Archery 3D Targets High Density Foam 40cm Cube Bow Arrow Shooting Practice

RRP: \$359.95

Introducing the ultimate professional crossbow target - designed for precision shooting with six-sided shooting capability and high visibility aiming dots.

Crafted from advanced XPE material, this target features high-density polyethylene foam, providing exceptional internal resistance that prevents the arrows from piercing through. Not only does it enhance the target's durability, but it also allows for easy arrow removal, reducing archery fatigue during your practice sessions.

Unlike other targets, this big heavy-duty arrow target boasts superior weight, ensuring it remains firmly in place without being easily knocked down.

For your convenience, the target comes equipped with a handle, making it effortless to transport. Its lightweight design further enhances portability, allowing you to carry it with ease wherever you go.

Approved for use with compound bows, crossbows, recurve bows, and traditional bows, this crossbow target is the ideal companion for all types of archery enthusiasts seeking a reliable and effective shooting experience.
