

## 2x Dog Bowl Slow Feeder Insert

RRP: \$69.95

Save on the cost of new dog feeding bowls – just by inserting this innovative feeder design into your existing bowls and lock it securely using the advanced, updated suction system.

It's widely recognized that rapid eating isn't healthy for dogs. However, the solutions available are often pricey or unreliable. Our solution is refreshingly uncomplicated yet exceptionally effective, making it a strong recommendation.

The slow feeder dog bowls feature 38 small suction cups on the underside, exhibiting a gripping power akin to that of an octopus, anchoring the feeder firmly to the base of the dog bowl without the need for water. This design is effortlessly portable and can be conveniently transferred or swapped between different bowls.

Designed for both wet and dry daily food options, it is ideally suited for dog bowls with a bottom diameter ranging from 17 to 14cm. For added convenience, it can also be trimmed to fit bowls with a minimum diameter of 12cm.

### Specifications:
