

Kneeling Office Chair Ergonomic Rocking Posture Improving Stool

RRP: \$299.95

Whether you work in an office or remotely from home, comfort is an essential ingredient in productivity. With this ergonomically designed kneeling chair by Randy & Travis Machinery, you'll be able to think about your work, not your aching shoulders, back, or neck. Crafted from sturdy yet lightweight birch timber and soft velvet, this chair features thick, comfy knee pads and a padded seat. With its neutral colour palette, this chair works well with practically any office or home décor.

Accommodating users up to 140 kilogrammes, this chair makes a great choice for commercial customers. Outfitting your entire office staff with these chairs will likely expand your workforce's enthusiasm for getting to work early each morning. Its rocking motion soothes a user's mind and body, while the semi-kneeling position provides the optimum body alignment for long stretches of work. With a direct line of vision, your employees won't have to extend their necks to see what's on their screens. Its backless design encourages perfect posture, so a user's spine will be in ideal alignment. The semi-kneeling position with supportive knee pads helps to prevent swollen legs without straining users' knees. Don't spend another day thinking about your pain instead of your work. Order your comfort station today!
