

120 Degrees Camera Mirror Car Rear View Reverse Night Vision Parking System Kit

RRP: \$119.95

We are thrilled to introduce the Randy & Travis Rearview Camera Mirror Parking System Kit, designed to provide extensive protection and convenience for your driving safety. Day or night, this equipment is ready to capture crucial moments, offering a range of intelligent features to elevate your driving experience and instill confidence and peace of mind. The rear view backup parking assist camera is installed above your vehicle's license plate - no need for drilling.

Combine it with an in-vehicle monitor display screen to view the front (when shut off) and rear of your vehicle, this car camera features a 120-degree wide-angle lens, perfect for backing up.

It's a 100% waterproof IP86 high-definition camera for rear views. It includes night vision capability with 9 flat white LED lights, enhancing visibility and image quality. The auto cam is equipped with 9 LEDs and 1 light sensor, automatically activating the night vision mode in low-light conditions. You can enjoy high-definition image quality thanks to the advanced CMOS sensor and camera lens.

This product is designed to smoothen your driving experience and inspire a sense of confidence so get yours today!
