

Ergonomic Kneeling Posture Chair with Backrest Adjustable Height and Casters

RRP: \$384.95

This ergonomic kneeling chair with a backrest maintains your back at a comfortable angle, distributing pressure between the buttocks and legs. This effectively alleviates discomfort in the neck, back, and spine, allowing you to fully enjoy your workday.

You can easily adjust the seat height and kneeling pad using the hydraulic lift, ensuring a perfect fit. The chair's height is adjustable but keep in mind that it's advisable to take periodic breaks and stretch when using this chair for extended periods.

The Randy & Travis kneeling chair boasts a generous 10cm cushion thickness made of memory foam. This upgraded thick cushion not only safeguards your hips and knees from injury but also delivers maximum comfort. It maintains its shape even after prolonged use.

Equipped with four removable metal casters that can rotate 360 degrees, this workstation chair glides effortlessly, even on carpeting. Two of the casters feature wheel locks for added stability. This chair is especially well-suited for individuals who spend long hours working from home - or even in the office.

Features:

- Easy to assemble the kneeling chair with the help of the manual
- Helps take the pressure off your back, neck, shoulders, and vertebra
- 55- 65cm adjustable height makes it suitable for most people and desks, with 100kg weight capacity
- PU material surface and polished metal structure allows for easy cleaning
- All-black colour matches seamlessly to a variety of work/home décor
