

## Retractable Straight Drop Roll Down Awning Garden Patio Screen 3.0X2.5M

RRP: \$419.95

If the intense sun during hot summers fades out your finest furniture or makes entertaining on the patio an unpleasant experience, Bariloche's 3.0 m x 2.5 m retractable straight drop patio screen can solve this home décor challenge. Not only does it shield your home or patio from the sun's scorching rays, but it also shelters your home from winds, helping you stay warmer in the winter as well.

Used outdoors to screen your patio or garden, it creates a private backyard retreat that's shielded from your neighbours' eyes. Used at the back of your patio to block sunlight that comes into your home through a large window or sliding doors, it does double duty as a pretty backdrop for summer parties. Inside, it can screen your sunroom or another room with large windows, preventing sun damage to furniture.

Designed in a neutral grey shade to blend in with today's subdued design schemes, this drop-down awning blends in with a large range of home colour palettes.

Manufactured with a durable aluminium frame and a tear-resistant 100% polyester fabric shade, this screen will last—and look great—for years to come. Both the shade and frame are tear-resistant, UV-resistant, and breakage-resistant to help it endure even the harshest weather conditions.

Operation is easy. All you need to do is to use the handy crank rod to extend it during sunny or windy weather or retract it when you want to enjoy the scenery outside.

Mounting the shade and frame is a breeze with the wall brackets. We do, however, recommend that you hire a professional installer to ensure a safe, correct installation.

Don't allow the scorching sun to damage your furniture and your skin. Create a backyard haven with this retractable screen awning. Buy yours today.
