

2.2L Dehumidifier Portable Quiet Home Air Dryer for Mould Moisture Damp + Remote

RRP: \$239.95

Our 2.2L Dehumidifier works by a purification mode which enhances air quality by filtering fine particles, effectively removing allergens and promoting relief from allergy symptoms. By capturing airborne particles and harmful gases, it minimizes irritation to the eyes, nose, and throat. Additionally, it hinders the spread of trapped bacteria.

The dehumidifier also features a sleep mode by pressing the moon button on the remote control. The dehumidifier's LED display will feature a sleep light, ensuring continuous, quiet operation throughout the night. Even quieter than a library, it maintains an ideal humidity level for a peaceful night's sleep without disturbance.

The crystal LED display and remote control provide real-time information on your surroundings' air quality, offering immediate control of the dehumidifier. With a power consumption of only 90W, it stands as one of the most energy-efficient dehumidifiers on the market.

Excess moisture in the air fosters mold, bacteria, and dust mites in your home. Our dehumidifiers extract up to 500 ml of water daily, safeguarding your home and furniture while maintaining healthier humidity levels. Suitable for small to medium-sized rooms and poorly ventilated areas prone to damp odors and fungi.

Specifications:

- Colour: white
- Quantity: 1pc
- Net weight: 2kg
- Product size: 24.5x13.7x37.5cm
- Water tank capacity: 2200mL
- Dehumidification capacity of about 1080ml/ day
- Voltage: 220V; 50Hz 90W
- Mononuclear, LED display
- Material: ABS
- Accessories: remote control/drain pipe/power adapter
